### **VIA FACSIMILE AND E-MAIL**

Mr. Tom Turner
Associate Regional Counsel
United States Environmental Protection Agency - Region 5
Office of Regional Counsel
77 West Jackson Boulevard (C-14J)
Chicago, Illinois 60604-3590

Re: Clayton Chemical Site General Notice of Potential Liability

UOP LLC

Dear Mr. Turner:

The purpose of this letter is to respond to the United States Environmental Protection Agency's (U.S. EPA) recent request to provide copies of a material safety data sheet (MSDS) for "p-nitroanaline." As we understand it, the U.S. EPA will use that information, in part, to decide whether UOP LLC (UOP) will remain on the list of the top seventy-three generators at the Clayton Chemical Site (Site). Attached is the responsive information.

While we have provided the MSDS for p-nitroanaline, we hope that the U.S. EPA will consider the information in the proper context. Specifically, at no time did UOP ship p-nitroanaline to the Site. As we discussed, UOP previously used p-nitroanaline as a chemical feedstock in a reaction to manufacture a variety of antioxidant products at UOP's McCook, Illinois plant (Plant) until about 2000. Between 1981 and 1982, p-nitroanaline cost approximately \$1.50/pound and, during the subject reaction, was driven to extinction. Thus, UOP did not dispose p-nitroanaline because it served as a valuable chemical feedstock that was totally consumed in the chemical manufacturing process.

Instead, UOP shipped to TWI, Inc. <u>for incineration</u> empty 55 gallon fiber drums, which were formerly used to deliver the p-nitroanaline to the Plant. See Exhibit 3 of March 25, 2005 Letter (Certificates of Incineration). The waste profile data sheet of the material shipped by UOP to TWI, Inc. for incineration was:

Mr. Tom Turner May 3, 2005 Page 2

Fiber containers	94%
Polyethylene liners	2.5%
Filers	2.5%
Mineral adsorbent	0.5%
Rags	0.3%
Plastic gloves	0.2%

See Exhibit 1 of March 25, 2005 Letter. Thus, the most appropriate description of UOP's waste for the U.S. EPA's consideration is the one we previously submitted on March 25, 2005.

As we stated before, we hope that, after fully considering all of the information provided to date, the U.S. EPA will conclude that UOP should no longer be on the list of the top seventy-three generators at the Site.

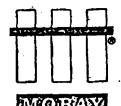

We appreciate your time and consideration of these items.

Sincerely,

Steven J. Murawski

Steven J. Murawshi
